

INVESTMENT KA DHURANDHAR

Prepared for SAFAL INDUSTRIES

An estimated 28.9% IRR — a 25-year, asset-backed, inflation-protected return on a 50 kWp rooftop solar plant. A return no FD or bond can match.

**28.9%**Annual Return

Where else does Rs 25.5 lakh work this hard?

Your net capital (ex-GST) vs the same money in capital-protected instruments — annual return.

Value back on Rs 25.5 lakh over 25 years

Solar: Rs 1.90 Cr

Your capital, compounding for 25 years

1 · System size -> 50 kWp

Solar produces only in the 09:00-17:00 window (Zone C) — ~4,633 units/month, about 81% of daily use; the 06:00-09:00 slot (Zone B, ~36 units) is negligible and excluded. The 12-month daytime load needs ~46 kWp for full cover; this system is sized at 50 kWp to fully meet daytime demand with headroom for load growth (a small daytime surplus exports).

2 · Per-unit value -> Rs 6.56/unit

Built from your bill: base energy Rs 7.66 + demand Rs 1.52 + FAC Rs 0.20 + tax-on-sale Rs 0.29 + daytime ToD rebate -Rs 1.15 - Grid Support Charge Rs 1.96 = Rs 6.56/unit — the real value each solar unit offsets, net of the ToD rebate and the GSC.

Technical snapshot

Plant capacity	50 kWp (DC)
Modules	Bifacial, ~580 Wp (~86 panels)
Inverter	String inverter, 50 kW class
Annual generation	~73,000 units
Capital outlay (incl GST)	Rs 27,76,950
Net capital (ex-GST, ITC)	Rs 25,50,000
Metering	Net metering (bidirectional)
Warranty	Modules 25-yr perf. / Inverter 5-10 yr

Financed option — 10% down payment (standard scenario)

Rs 2.78 L

Your cash in (10% down + fees)

Rs 22.95 L

Bank loan @ 9% / 60 months

Rs 47,640

Monthly EMI

Rs 56,312

Monthly solar saving (Yr 1)

43.2%

Return on your cash (levered IRR)

Rs 1.08 Cr

Net earnings / 25 yrs (financed)

A small down payment, with the loan serviced by your solar savings. In Year 1 the saving (Rs 56,312/mo) covers the EMI (Rs 47,640/mo) with cash to spare; as the depreciation benefit tapers it is broadly matched by savings until the loan clears in Year 5, after which the full savings stream is yours. Return on your own capital is about 43%.
